SHINE A LIGHT: THE IMAX EXPERIENCE. Academy Award-winning filmmaker Martin Scorsese and the world's greatest rock n' roll band, The Rolling Stones, unite to bring audiences the most extraordinary musical film event of the year. Paramount Classics, in association with Concert Productions International and Shangri-La Entertainment, will release SHINE A LIGHT. This is an immersive look at The Rolling Stones, the band that defined the very idea of what a rock & roll is, live through the eyes of Martin Scorsese. It is hard to overestimate the importance of The Rolling Stones in rock & roll History. The group, which formed in London in 1962, distilled so much of the music that had come before it and has exerted a decisive influence on so much that has come after. Only a handful of musicians on any genre achieve that stature, and the Stones stand proudly among them.
